Periodic Lane Closures on Fourth Street

(Longview, TX) Periodic lane closures will occur on Fourth Street between Hollybrook Drive and just north of Clinic Drive. The lane closures are expected to start Friday, July 27, 2012 and last approximately 20 months. The lane closures will typically be the south bound right lane and will occur periodically during the construction of the new addition to Longview Regional Hospital. The periodic lane closures will be in affect for the safety of the public and construction crews.

This project is being constructed by Robins & Morton of Valparaiso, IN. If you have any questions about the construction, please call the City Engineer, Mark Adas, at 903-237-1053.
